SWISS ARMY APPROVED · **IP65** · **SWISS MADE** · WiFi

Description:

Moving carriers allowing the mounting of up to two "CF", "CP" or "CPF" targets. Exists in a fixed as well as in a mobile version.

Can be remotely controlled with a CRC4 (*radio command unit*) or from a central command unit equipped with ciblesCOM (*additional functions are then available*).

Movements:

One way; back and forth; random (*position and speed*) and movements towards specific positions.
The position of the target carrier is defined in real time with a resolution of about 10 cm.

Type of use:

The Baur SA moving target carriers can be used either in a fixed version (*Fig. 1, mounted on a wall or a flat surface*) or in a fully mobile version (*Fig. 2, tripods*).

Installation:
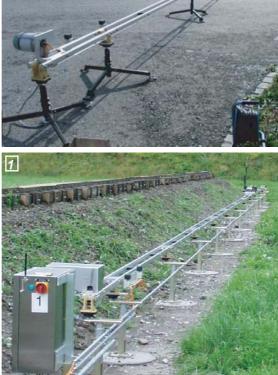

In the tripod version, the Baur SA moving carrier can be installed in less than 2 hours. No terrain adaptation is required.
The length of the mobile carrier can be set from 5m to 50m.

Moving targets:

All Baur SA infantry targets can be used with the target carrier (max. 2 targets per carrier). No specific tools required to mount them . Orientation of the target can be set as you wish.

Moving Target Carrier "MTC"

Technical specifications:

Spd^{Max}:	4 m/s
Acceleration:	1 m to reach Spd^{Max}
Length:	5 à 50 m (3 m increments)
Slope:	max. 15°
Interfaces:	WiFi (WLAN 802.11b)
	Radio VHF (136-174 MHz)
	Radio UHF (403-470 MHz)
Power supply:	230/380 VAC
Duration of life:	Our products are built to last 25 years

Key features:

All target parameters can be accessed and modifed remotely   (*target ID, length, radio channel, ...*).

Can be controlled by radio (*stand-alone, no central command unit required*) or in WiFi mode (*ciblesCOM software and adequate WiFi coverage required*)

Mobile version provides maximum flexibility for installation and use (*tripods*)

Accessories:

Moving Central Command Unit
(Tablet PC)

Minimum configuration:

- command unit
