SWISS  MADE

## Description:

Universal battery charger for batteries used with Baur SA target systems and accessories (12V NiCd). Fast charge (max. 2h30), easy transport and storage thanks to a specially designed container. Different configurations available.

## Charge stations:

5 to 10 batteries can be charged simultaneously (Depending of the charger model)

## Transport:

A dedicated container makes the transport and storage simple (All the sensitive components are protected)

## Typical use:

All NiCd batteries for BaurSA target systems can be charged with this charger

## Battery charger "CF3.120/x"

### Technical specifications:

Size: 300 x 300 x 500 mm  
(400 x 500 x 580 with container)

Weight: 16.5 kg (without container)  
31 up to 41 kg (with container)

Charge stations:

1 to 10

T<sub>Charge (Max)</sub>: 2h30 (Accu 12V/7Ah)

Power supply: 230 VAC

Use: Only in dry room  
(high voltage)

Battery type: 12V/7Ah NiCd  
12V/2.3Ah NiCd (CRC4)

Duration of life: Thousands of charge cycles can be performed

### Key features:

'Reflex' like charge process minimizes memory effect

Batteries can be connected at any time to any charge station

Fast charge (less than 2h30)

LED shows the charging process and/or errors.

## Accessories:

At that time, no accessories are available for this device

## Minimum configuration:

- dry room
- access to 230 VAC
